Budget Quotation For Nextgen AI Learning Platform Development

NEXTJS | NODEJS (JAVASCRIPT)

Proposed To :

Mr. Ishfak Eraz

ishfakeraaz@gmail.com

+8801883132020

Requirement Notations:

1. Funnel Landing Page

Page URL

The landing page will be hosted at the following URL: nextgenai.academy

Key Features

- Navigation Bar: The navigation bar will include only two buttons: Home (link to the landing page) and Courses (link to the course page).
- Course Overview: Showcase the courses offered, including descriptions, benefits, and features.
- Discounts and Offers: Display current discounts and special offers to encourage conversions.
- Featured Courses: Display the most popular or featured courses to attract attention.
- Pop-up Notifications: Display recent purchase notifications to show activity in real-time. Initially, dummy data will be used, but it should be replaced with actual purchase data over time.
- Timer-Based Offer: Include a countdown timer offering limited-time discounts for

urgency.

- User Focus: The page will focus on clearly explaining why our course is the best, detailing its value proposition, structure, and benefits.
- Lead Generation: Provide clear calls-to-action (CTAs) for users to either purchase a course or sign up for more information.

Visual & Design Considerations

- The design should be clean, modern, and focused on user conversion.
- Emphasize the course benefits in clear, easy-to-read sections.
- Use bold CTAs for course purchases.

2. Student Dashboard

Page URL

The student dashboard will be hosted at nextgenai.academy/dashboard

User Authentication

- After purchasing a course from the funnel page, students will receive a welcome email with a link to the dashboard.
- Students can sign up using the same email they used for purchase. OTP verification through their phone number is also required.
- A password recovery section will be available.
- No third-party login methods (e.g., Facebook, Google) will be allowed.

Dashboard Sections

- Student Panel:
 - Progress Tracker: Track progress per course and module, with visual representations like bar charts or graphs.
 - Assignments: Show upcoming assignments with deadlines and allow students to submit them.
 - Ranking System: Show rankings based on assignment marks and a separate hackathon ranking. Both rankings will be displayed dynamically.
 - Course Modules: List modules and topics with class notes and other attachments (PDF, Word documents, etc.).
 - Profile: Allow students to edit their profile information.
 - 1:1 Meeting Booking (Future Implementation): Include a section for future 1:1 meeting booking.
- Admin Panel:
 - Dashboard Overview: Display total students, courses, enrollments, admins, and instructors.

- **Course & Content Management:** Admin can add categories, courses, modules, and content with metadata (title, description, etc.).
- **Enrollment Management:** View and manage student enrollments, track progress, and manage discounts through a coupon system.
- **Earnings & Analytics:** Track total earnings and detailed analytics on revenue, payments, and purchases.
- **Notification System:** Send notifications to all or selected students via email or push notifications within the platform.
- **Payment Integration:** Integrate with Bkash Merchant for seamless payment processing.
- **Module Lock/Unlock:** Admins can lock/unlock modules based on student progress.

3. Visual Design & Usability Considerations

- The design should be modern, clean, and responsive.
- The dashboard must be intuitive and easy to navigate.
- Mobile-first design is not required, but must be considered for responsive layout on smaller screens.
- Focus on a user-friendly interface with easy access to progress tracking and interactive charts.
- Use graphs and charts for visualizing student progress and rankings.

Service	Proposed Budget
LMS Platform Development [Frontend Technology: Next JS/React, Backend Technology: Node JS]	160,000 BDT

Estimated Timeline:

- **Design and Blueprint:** 7 Working Days
- **Development Phase:** 20 Working Days
- **Testing and QA Phase:** 10 Working Days
- **Deployment Phase:** 5 Working Days

Payment Structure For Website Development:

Modularized into 3 modules

- **Advance Payment:** 40% of the total budget
- **First Installment:** 40% of the total budget (After 50% work report before deployment)
- **Final installment:** 20% of the total budget (After 50% work report before deployment)

Additional Notes:

- **Timeline:** The provided timeline is an estimate and may change based on project complexity and feedback.
- **Validity:** This quotation is valid for 20 days from the date of issuance.
- **Maintenance support : 3 months of FREE maintenance support** after project development. After this period, support services will be available at a monthly charge, determined after consultation with the client. Here, maintenance means bug fixes and technical assistance to ensure your project runs smoothly.
- **Revisions:** We offer 2 free revisions as part of the project development. Any additional revisions beyond these will be subject to additional charges. Revisions do not include a complete redesign of the project under any circumstances.

Thank you for considering DataPollex for your project. We look forward to the opportunity to work together.

Rezowan Sifat
